

MarpolBase as a Knowledge Base

Yasuhiro Tanizawa

Takatomo Fujisawa

with Y. Yamamoto, T. Ohta, E. Bolton

Everything in our day-one plan — delivered.

- Published gene, expression and literature data as **RDF**
- Opened a public **SPARQL endpoint**, registered with RDF Portal and TogoMCP
- Built an **MCP server** with 14 typed tools over the endpoint
- Reached out to reactions, pathways and compounds through TogoMCP
- Drove analyses end to end from **natural-language prompts**, no hand-written SPARQL
- Found where the join happens: **KO / GO / compound IDs**, not gene IDs

marchantia.info — /rdf/ · /sparql · /mcp
